QUICK START GUIDE

CONNECTING WIRELESS INSPECTION CAMERA AND MONITOR

1. Attach the antenna to the monitor.
2. Press the power button  to turn on the monitor.
3. Press the power button on the camera.
4. Use the switch on the side of the monitor to select the desired working mode (e.g., Camera or Video).
5. Select the channel   the camera is on. The correct channel will display a clear picture on the monitor.
6. See page 12 for instructions on how to take photos and videos with your monitor.

HOW TO SET UP THE MONITOR MOUNT

ATTACHING THE MONITOR TO YOUR POLE

Your kit includes pole mount, mounting pad, mounting block, Allen key and socket screw.

STEP ONE:

On initial use, remove the socket screw from the mounting block (see Fig. 1).

Position the mounting pad onto the block (see Fig. 2).

Insert the socket screw through the mounting pad and tighten it with an Allen key (see Fig. 3).

To keep the monitor secure within the mount, tighten the locking orientation nut with an 8mm spanner.

Refer to Fig. 4 for the correct assembly.

Fig 1

Fig 2

Fig 3

Fig 4

STEP TWO:

Attach the mount to the pole and use the green lever to tighten to the pole.

CAMERA AND MONITOR CONNECTION

Attach the antenna to the monitor by screwing it clockwise into position.

Always ensure the antenna is in an upright position to connect properly to the signal of the camera as shown in (Fig. 4).

HOW TO SET UP THE CAMERA MOUNT

ATTACHING THE CAMERA TO YOUR NECK

Your kit includes camera mount with mounting bracket, camera strap and thumbscrew.

STEP ONE:

Attach the camera strap mount to the camera mount on the mounting bracket. Use the thumbscrew to tighten and secure in place (Fig. 1).

Place the camera on top of the mount and secure it with the camera strap (Fig. 2). This ensures the camera remains stable at heights.

Fig 1

Fig 2

STEP TWO:

Attach the mounting bracket to your neck by sliding it into position and tightening it with the green lever.

HOW TO INSTALL SUNSHADE COVER FOR MONITOR

How to install the sunshade onto your monitor

1. Place the sunshade over the top of your monitor so the 2 buckle pins align with the button holes on the monitor.
2. Gently push and slide so the sunshade locks into place. You will hear it click into place.
3. To remove the sunshade, gently push up in the opposite direction. You will hear it click out of position.
4. To open up the sunshade, push up on the middle button.
5. To close the sunshade gently push back down and it will click into the middle button.

HOW TO CHARGE YOUR WIRELESS INSPECTION CAMERA AND MONITOR

WIRELESS INSPECTION CAMERA

Plug the camera charger into the DC socket of camera.
You will see a red light indicating it is charging.
Once the camera is fully charged, the LED light will automatically turn off.

MONITOR

Battery capacity symbols:  Full Battery  Half  Little  Running Out - Please Charge

- Plug the USB (AC) charger to the USB (DC) socket of monitor.
- Charge monitor for 4-6 hours for full charge.
- For first time use, it is recommend to charge between 6-10 hours.

MONITOR

KEY SYMBOLS:

WIRELESS INSPECTION CAMERA WITH MONITOR

OPERATION

WIRELESS INSPECTION CAMERA

How to turn the camera on/off

Press the power on/off button on the rear of camera for 3 seconds to power on the camera. When turned on, the cameras lights will be on. To see that your camera is working correctly, point it to any object in front of you and power on your monitor to check visuals.

To turn the camera off, press the power on/off button for 3 seconds. The lamps will turn off and camera will stop working.

How to adjust the camera lights

To adjust your camera lights, press the on/off button to increase and decrease illumination of camera lights. It cycles in this turn: lamps on, lamps brighten, lamps off.

MONITOR

How to turn your monitor on/off

To turn on your monitor, press  for 3 seconds. The screen of the monitor will turn on.

To turn off your monitor, press  for 3 seconds.

Switching working modes

To change the working modes of the monitor, use the switch that is located in the left hand corner of the monitor.

When you switch modes, you will be able to switch between:

 Camera mode - for taking photos.

 Recording mode - receiving / recording video.

 Playback mode - view photos and play videos.

Automatic scanning

The monitor is in auto-scan mode by default.

To change the signal channel, use   the scan function to go through channels A1 to A8. You should choose the channel with the strongest signal. To test this, turn on your wireless inspection camera and as you scan through the channels, you will see a clear picture.

External storage card

You will need a SD card to be able to save video recording and photos. The screen will show the symbol of the SD card and its capacity.

View photos and videos on your computer

Connect the monitor via USB to your computer or remove the SD card, inserting into a card reader. You will be able to view your photos and videos. This will be in a removable disk folder under "DCIM".

HOW TO RECORD & TAKE PHOTOS - MONITOR

How to record videos

Put the monitor into recording mode  and press . This will start the recording and it will show on screen REC.

Press  to pause and the screen will show  and to continue recording pressing the  button again.

Press the back button  to stop the recording - this will save onto your SD Card.

If you have the overwrite function turned on, do not press the camera button  to end the recording, this will overwrite the earliest saved recordings if your SD card is full.

How to take photos

Put the monitor into camera mode  using the switch on the left hand side.

Press  once to take a photo, the screen will flash once and will take one photo.

How to turn the sound on/off for video recordings

When in recording mode , the sound is automatically mute. You will see that the screen displays "MUTE". To put sound on for your video recordings, press the back button , this will clear the MUTE displayed on the screen and the sound will come on.

Please note mute setting will not affect earphones.

Sound is on mute

HOW TO PLAY VIDEO/ PHOTOS

To view the photos and videos, use the switch on the left hand side to put the monitor into playback mode (▶). Use (◀) (▶) to select either photos or video. Press (📷) to select and (◀) (▶) to view. Press ↶ to exit and back to the main menu.

How to view videos

Select the video option and press (📷) to enter the video date folder (video files).

Press (◀) (▶) to select date and (📷) to enter into time phased video files. Press (◀) (▶) to select, and press (📷) to play video. Press (◀) (▶) to adjust volume. Hold down (◀) (▶) to rewind video forward or backward.

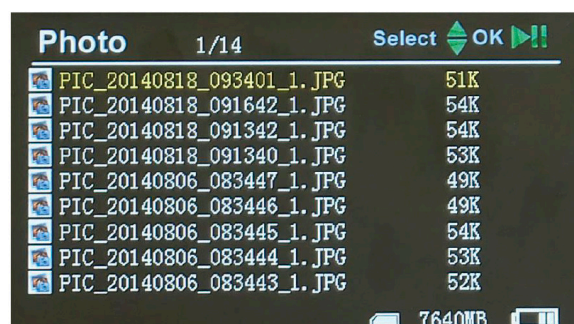

Press (📷) to pause the video and press ↶ to exit.

How to view photos

Select the photo option and press (📷) to enter into photo files.

Press (◀) (▶) to select the photos and press (📷) to view. Press (◀) (▶) to view next photo and previous photo and press ↶ to exit.

How to delete photos & videos

Under working mode, press (◀) (▶) to select files. Press (M) to get a dialogue.

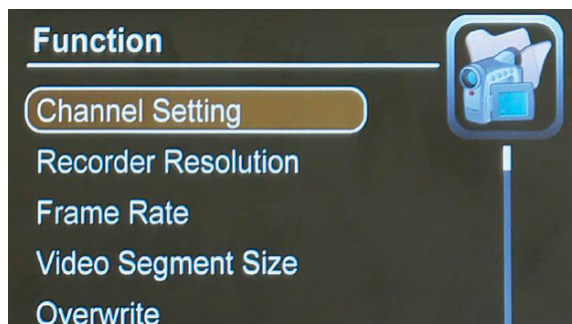

Press (◀) (▶) to select "All"/"Current"/"Cancel". Press (📷) to confirm.

***FUNCTION SETTINGS &
SYSTEM SETTINGS FOR MONITOR***

FUNCTION SETTINGS - MONITOR

To access the function settings for the video mode . Press on the (M) button and use (◀) (▶) to select the function option and press (📷) to enter into function menu.

Channel Setting

Use (◀) (▶) to select the 'Channel Setting' and press (📷) to enter. Use (◀) (▶) to select Auto, A,B,C,D and press (📷) to select and exit.

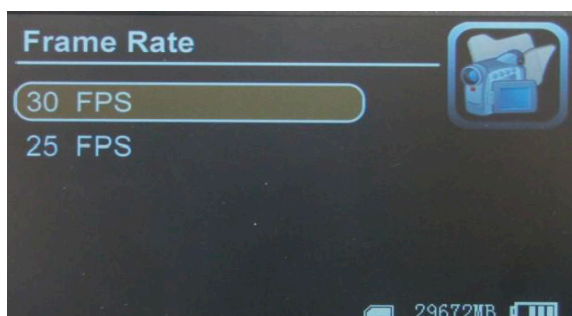

Recorder Resolution

Use (◀) (▶) to select 'Recorder Resolution' and press (📷) to enter. Use (◀) (▶) select your resolution either 720x576 or 720x480 and press (📷) to select and exit.

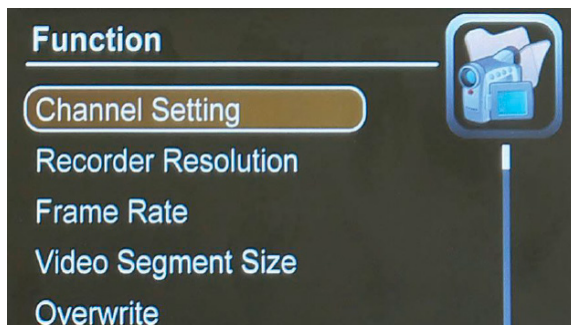

Frame Rate

Use (◀) (▶) to select 'Frame Rate' and press (📷) to enter. Use (◀) (▶) select your frame rate either 30 FPS or 25 FPS and press (📷) to select and exit.

Video Segment Sizes

Use ⏪ ⏩ to select the 'Video Segment Sizes' and press 📷 to enter. Use ⏪ ⏩ to select 10 Min, 30 Min, 60 Min and press 📷 to select and exit.

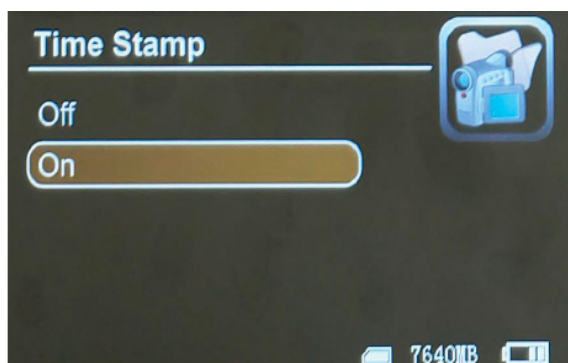

Overwrite

Use ⏪ ⏩ to select 'Overwrite' and press 📷 to enter. Use ⏪ ⏩ to select On or Off. Press 📷 to confirm and exit. If "Overwrite" is on, your monitor will cycle record, and save the latest video.

Time Stamp

Use ⏪ ⏩ to select the 'Time Stamp' and press 📷 to enter. Use ⏪ ⏩ to select Off or On and press 📷 to confirm and exit. If it's on, video will be saved with synchronous time.

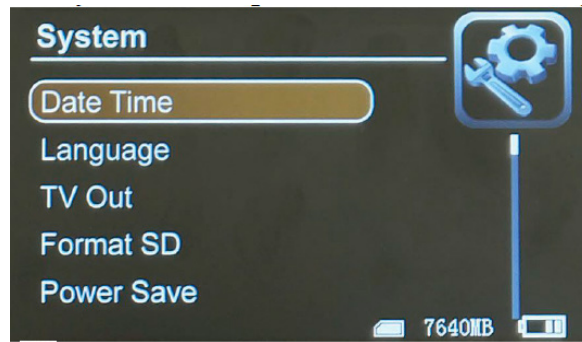

Video Setting

Use ⏪ ⏩ to select 'Video Setting' and press 📷 to enter. Use ⏪ ⏩ select your adjust your brightness or contrast. Press 📷 to select the option and then use ⏪ ⏩ to adjust press 📷 to select and exit.

SYSTEM SETTINGS - MONITOR

To access the system settings, press **(M)** (menu) button and use **(◀)** **(▶)** to select 'System' option. Press **(⏏)** to enter into system settings menu.

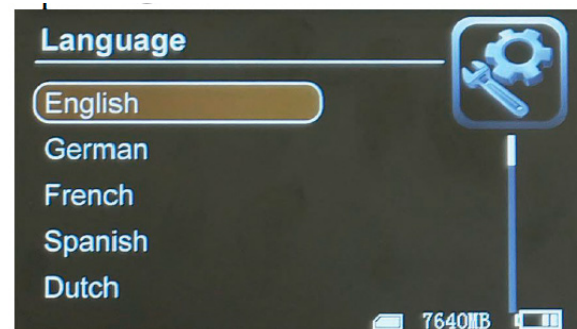

Date Time

Use **(◀)** **(▶)** to select the 'Date Time' and press **(⏏)** to enter. Use **(◀)** **(▶)** to adjust the date and time. Press **(⏏)** to confirm the adjustments. Press **(↶)** to exit.

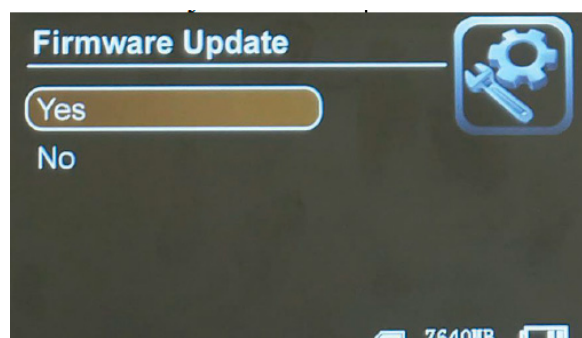

Language

Use **(◀)** **(▶)** to select the 'Language' and press **(⏏)** to enter. Use **(◀)** **(▶)** to select your language. Press **(⏏)** to confirm and exit.

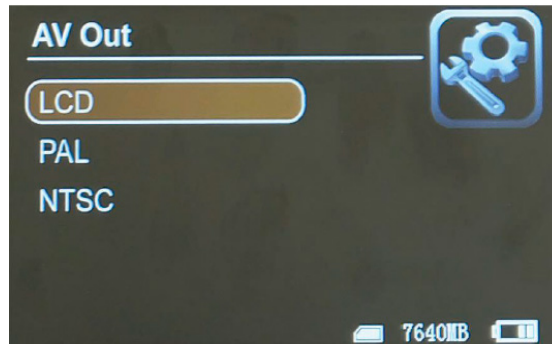

Firmware Update

Use **(◀)** **(▶)** to select the 'Firmware Update' and press **(⏏)** to enter. Use **(◀)** **(▶)** to select yes or no and press **(⏏)** to start update. Please remember to save update file "zburnT_C11.run.elf" at root directory of SD card.

AV Out

Use ⏪ ⏩ to choose 'AV Out' and press 📷 to enter. Use ⏪ ⏩ to choose LCD, PAL OR NTSC. Press 📷 to confirm video displayed on TV screen. When you remove the AV cable, the video will come back on the monitor screen.

Format

Use ⏪ ⏩ to select the 'Format' and press 📷 to enter. Use ⏪ ⏩ to choose Yes. Press 📷 to confirm and exit.

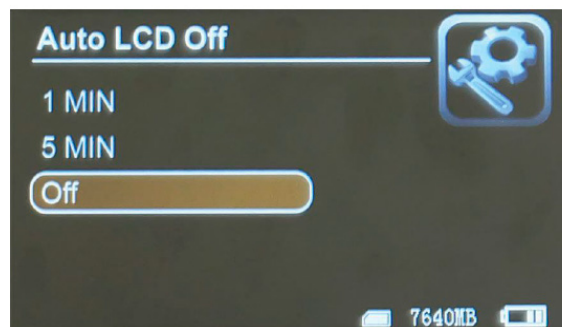

Power Save

Use ⏪ ⏩ to select 'Power Save' and press 📷 to enter.

Auto LCD Off

Use ⏪ ⏩ to select the 'Auto LCD Off' and press 📷 to enter. Press ⏪ ⏩ to select either 1 Min, 5 Min or off. Press 📷 to confirm & exit.

Auto Power Off

Use ⏪ ⏩ to select the 'Auto Power Off' and press 📷 to enter. Use ⏪ ⏩ to select either 1 Min, 5 Min or off. Press 📷 to confirm & exit. If time is selected, the monitor will automatically shut off when the set time is due.

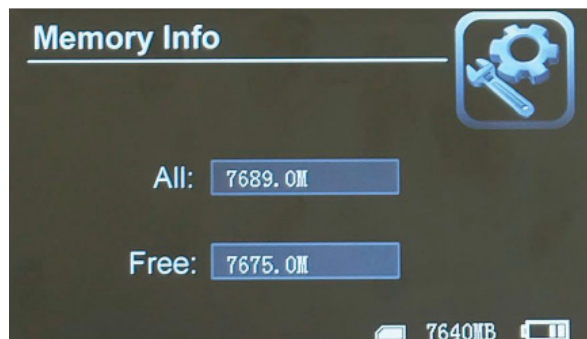

Default Setup

Use ⏪ ⏩ to select the 'Default Setup' and press 📷 to enter. Use ⏪ ⏩ to select Yes or No and press 📷 to confirm. Press ↵ to exit back to main menu.

Memory Info

Use ⏪ ⏩ to select the 'Memory Info' and press 📷 to view capacity of SD card. Press ↵ to exit.

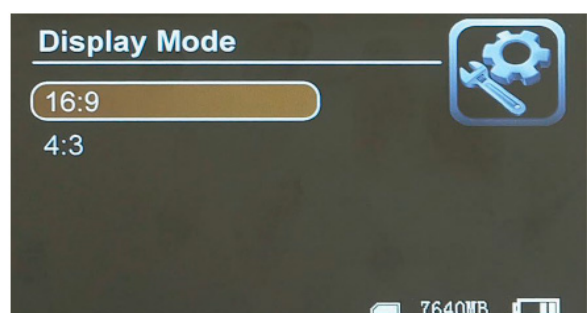

Version

Use ⏪ ⏩ to select the 'Version' and press 📷 to view version information.

Display Mode

Use ⏪ ⏩ to choose 'Display Mode' and press 📷 to enter. Use ⏪ ⏩ to choose your display screen size either 16:9 or 4:3. Press 📷 to confirm and press ↵ to exit.

TROUBLE SHOOTING - MONITOR

1. It does not power on: Attempt a full charge.
2. System halted: Press the RESET key to turn on player again.
3. It does not play, maybe the format of the video file is not supported by this DVR, please convert it into the supported format.
4. The test is in a messy code: Make sure the correct language is selected.
5. It does not upload / download files or cannot find the disk in PC: Replace USB cable/USB port.
6. It does not save file: SD card is not in DVR, please insert SD card; or SD card memory is full, please delete some files to release memory; or there is damage area in memory, please format it.
